Short Bio

I have been tinkering with technology all my life, and it's my passion.

I have experience with multiple technologies, but most recently I have dedicated my time to RPA, creating, training and managing a team as part of a Center of Excellence for a multinational company.

During this time, I have also continued to work on parallel projects related to ETL and web development.

Skills and Technologies

Most Recent Achievements

2019-2021

WhiteStar Asset Solutions (Arrow Group Global)

- Managed the RPA initiative selecting, training and guiding an Agile team, working across countries on automating many of the daily constraints of the companies.
- Started the implementation of a testing team.
- Created a new Blazer interface for the internal Jira system.
- Automated and adapted the Azure DevOps platform to our needs.
- Created a new template for RPA projects.
- Worked on CI/CD for the projects.
- Created an integration between Azure Service Bus and UiPath Orchestrator.
- Worked on and managed a platform for data extraction for ETL.
- Worked on the boarding of documentation doing OCR, and ETL.
- · Worked on creating models for ML.

PERSONAL

Whenever I'm free, I take time to:

- Relax with family and friends.
- Work on personal projects such as home automation.
- Study for my degree.
- Play video games with my son.
- Travel.
